siRNA-Synthesis

VBC-Biotech offers RNA-Oligonucleotides for RNAi-applications
siRNA-oligos are ready to use (no further processing is required).
The RNA is provided with the sense and antisense strands in separate tubes.
The oligos need to be duplexed by the end user.
The 2'-OH protecting group has been hydrolysed to its native hydroxyl (2'-OH) form.
DNA-overhangs are included in the duplex-price.
